

1 Overview

Avacue is a high tech information technology services organization in Asia, providing IT consulting services to customers of all sizes – ranging from blue chip companies to small and medium size enterprises. Currently with 3 offices located in Hong Kong and China, delivering a wide range of consulting, technology and outsourcing services, we quickly mobilize our resources and skills to help clients accelerate innovation and bring idea to realization more quickly at eSpeed.

The integration of our consulting, technology and outsourcing services with our affiliates and alliances, provides us with advantages in delivering value to our clients.

Among the many strengths that distinguish Avacue in the marketplace and enable us to help clients accelerate the execution of their visions are:

- our enduring relationships with the world's leading corporations;
- our highly motivated management team;
- our innovation and expertise in the Information Technology industry; and
- our profound industry knowledge with most of our senior managements are from world class consulting firms including Accenture, Excel Technology, Intergraph, PCCW, etc.

2 Strategic Delivery Capability

Our global strategic delivery approach emphasizes quality, time to market, minimized risk, enabling us to deliver competitive solutions and services that create value to our clients.

One of our key strengths is our ability to create and identify patterns of methodologies and technologies, which we can customize to create tailored solutions for our clients in a cost-effective manner.

Our delivery centers facilitate our professionals in using proven methodologies and existing assets to create business solutions for clients. Our delivery centers also improve the efficiency of our engagement teams as they are able to reuse solutions designs, architectures, team experience, infrastructure and software components.

3 Affiliates and Alliances

Our affiliates and alliances enhance the ability of our operating groups and project teams to deliver value to clients by providing us with insight into and access to emerging business models, products and technologies.

If a capability that we do not already possess is strategically important to us and our clients, we may form new business venture with one or more parties, to develop capability groups.

With different strategic alliances, we can then leverage different skill set and competence of different partners. We are then able to deliver solutions at eSpeed without the trade off of quality.

4 Research and Innovation

We believe value is created or a byproduct of innovation process. We spend more than 25% of our profit to support our ongoing researches. Our research investment help us to create, commercialize and disseminate innovative business strategies and technologies.
